All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

"Christianity had brutally planted the poisoned blade in the healthy, quivering flesh of all humanity; it had goaded a cold wave
of darkness with mystically brutal fury to dim the serene and festive exultation of the dionysian spirit of our pagan ancestors."
