All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

A bunch of random things I'm quickly plowing through, so nothing specific. Lots of post-rock stuff.

El Ten Eleven-Indian Water

Here's post-rock that thinks outside of the box (in some ways) and still manages to sound kinda boring and generic.

If it's musical, as far as I'm concerned, it's a song.

But technically if it's got no vocals, people call it "instrumental". But whatever. Still a song to me.
