This band consists of one guy...Who does vocals, drums, and plays a dulcimer. Definitely a bizarre technique to play black metal

Black Sun Empire - *Adaptation*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Meh. It was an interesting experience for me the first time I listened to this album, but now I feel like I have better things to listen to.

Deafheaven-Irresistible

Funny thing is I think my favorite songs are the most mellow ones.
