I'm not even going to bother saying "The F?" anymore because the whole things weird.

Even though the vocals work for this I hope these vocals aren't actually a part of the band normally...

.....I think the math rock aspect of this band rubs off on their names. It has more of a math rock song name to it most of the time. Same with And So I Watch You From Afar. Not really sure with 65daysofstatic.

Talk about lazy song uploading. The video just says "5" for the 5th song in the album. I don't even know how my YouTube search actually finds it right.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
