This would be a great song if it weren't for the vocals.

I like 21p but I have very conflicted opinions on that album. The Judge is a good song but it's too long imo (I have nothing against longer songs, and that song isn't even five minutes, but it feels like it should be shorter).

I don't like Twenty One Pilots or dislike them, since I only heard this song today, but seriously, those vocals make me cringe a bit (though the instrumentals and tune is nice).

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
