I really think you might be one of my favourite people on this website. If you don't mind, do you have any recommendations for further listening, or should I just jump in with the debut?

Jump in!

Thank you again. ☐ I post links to the songs, not just titles, for others to enjoy. I am blessed with a good ear and instant recall of years of listening and coupled with Youtube and other sites I am enabled. You can backtrack the thread, but I will continue to provide the tunes. Sometimes I get into jags on progressive or new wave or just about anything, except disco. I love the period between 1976 and 1986 in particular for new wave, modern rock, alternative. Anollasia can argue, lol, which is which and why, but I love it all. It is truly nice for you to speak up as it is encouraging...
