I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I don't really believe in perfect albums, either. I'm kinda like Anthony Fantano when it comes to giving albums ratings.

Anyway, there's a lot of people listening to Ted Nugent in this thread recently. I've had no interest in even trying to listen to him because he's like the biggest asshole I know in music. I don't tend to like letting who people actually are ruin my opinion on someone's music, and I typically know nothing about them at all, but he has proven to be enough of an asshole I have little care in even trying to give him a chance.

Take note that I'm not trying to say people shouldn't listen to him, just throwing out my unnecessary opinion ☐

Speaking for myself, I listen to Nugent's *music*, not his politics. If I cared about most celebrities opinions, I probably wouldn't watch or listen to anything.

Daft Punk-Contact

Enjoyed what I heard of this song from my dad listening to it. I guess I might give the whole Daft Punk album a chance, but I wasn't really a fan of much of it that I've heard
