Hell's Bells: Ask not for whom the bell tolls, it tolls for thee.

This isn't Wall Street, this is Hell. We have a little something called integrity.

And I heard as it were the noise of thunder, One of the four beasts saying come and see and I saw, and behold...

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
