I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Thanks Azrael for uh...posting you were listening to this. I'm quite enjoying these guys. I think more so then Karnivool. Though, I still need to listen to Karnivool more.

No problem, man. Karnivool only have two albums, though, so it shouldn't be hard to find all their stuff.

I have all of Rishloo and Karnivool's stuff on Spotify playlists now.

Also, Freaks & Animals is fantastic.

Sadly, I just read that Rishloo broke up. 3 of the band members seem to be making another band, though.

UNKLE - Celestial Annihilation

The dead swans lay in the stagnant pool.
They lay. They rotted. They turned
Around occasionally.
Bits of flesh dropped off them from
Time to time.
And sank into the pool's mire.
They also smelt a great deal.
