Game Shows Touch Our Lives by The Mountain Goats.

Shadows crawled across the living room's length.
I held onto you with a desperate strength...
With everything, with everything in me.

And I handed you a drink of the lovely little thing
On which our survival depends.
People say friends don't destroy one another...
What do they know about friends?

**Thunderclouds forming, cream white moon...
Everything's going to be okay soon...
Maybe tomorrow... maybe the next day...**

Days like dominoes, all in a line

Emerge transformed in a million years, from days like these

Queens Of The Stone Age - *Smooth Sailing*

Quite possibly my favourite QOTSA song.

Quite possibly my favourite QOTSA song.

Queens of the Stone Age-Keep Your Eyes Peeled

The only real Queens of the Stone Age song that I know I care about. Found their album last year to be rather underwhelming for the huge hype it was getting in the more "underground" realm. Don't really get the huge praise of it, personally. Most of it was boring.

My [Last.FM](#) and [RYM](#)

I found ...like Clockwork to be rather underwhelming as well, except for the aforementioned single, which I think is very good. The album doesn't have much variation, it's rather samey, my favourite QOTSA albums are still Era Vulgaris and Songs for the Deaf.

Redlight King - *Bullet In My Hand*

I like her song "Possibility", especially the live version.

Huh, I don't even see it on the 3 albums I have of hers on Spotify.

My favorite of hers are Love Out of Lust, Silent My Song, and probably I Never Learn. Not hugely into her music, but some of it is definitely good.

My computer doesn't play YouTube anymore...so I'll have to switch to something else to watch that.

That could possibly be the song that got me into her, I'm not sure. My brother posted something related to her once and I liked it.

Lykke Li-No Rest For the Wicked

I found by accident while searching for something related to Lana del Rey.

Lykke Li- Possibility (live)

In Slaughter Natives - *Beauty And Bleeding*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
