[Fantomas-Spider Baby](#)

I forgot this whole album is like covers of old movie themes done in a weird avant-garde kind of way.

Edit: A favorite of mine.

[Fantomas-Twin Peaks: Fire Walk With Me](#)

I have 77 Fantomas songs on a playlist and they only have 3 albums....4 if you include the 1-track album. In other words they have large albums. Considering, other then the 1-track album, their shortest album has 16 tracks. It'll be fun when I go through the 1 minute tracks like when I go through soundtracks.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
