Was soo tempted to use lyrics from Jonsi's dark song...

Also, 1/4th of the posts in this thread are by me...I made a new record of almost 3,000 posts in this thread so far. I don't know how I keep breaking my old records every new thread.

This is my new most posted thread as well with 1640 posts. Roughly 1/7 of this thread is me.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
