monke 2514 was the doppelganger to monke 2513

monke 2513 killed 2514 and then took his new personality as 2514 until he died

Monke 2509 fell victim of "Return to hoomanity, or draw 25"

Amurespublika

A mountainous country in North-East Asia, founded after a global nuclear war. An artificial God was made incarnated into the absolute monarchy, enforced miscegenation created a 100% mixed race population, the state was abolished, a 10km high skyscraper with a space elevator on top was built in the capital as a gateway for space exploration and colonization. In fact, space is a huge part of Amur culture, which is also a fusion of Soviet/Russian, and East Asian with slight European influences and Nazi Lunarpunk aesthetics.

Since Untecna killed multiple monkeys, we'll have to go back and revive them.

Monkey 2506 sacrificed himself to protect the other monkeys on the hunting trip.

One monkey at a time, lads.

Monkey 2501 had a heart attack upon realising that he was the penultimate monkey in the 2500's.

Jebslund is a nation of kerbals ruled by Emperor Jebediah Kerman. We reject tyranny, believing that rights should be protected, though we also believe said rights end where the rights of others begin. Shockingly, we *do* use NS stats, with the exception of lifespan.

Monkey 2499 drew the death card, courtesy of a poorly-thrown lawn dart.

Or well thrown, depends on your perspective.

Godulan Puppet #2, RPing as technologically advanced tribal society founded by mongols and vikings (and later with multiple other Asian and Native American cultures) motivated by an intrinsic devotion to the spirit of competition. They'll walk softly, talk softly, and make soothing noises as they stab you in the back and take your stuff... unless you're another Caleshan, whereupon they'll only stab you in the back *figuratively*!

Used NS stats: Population. That's it. Anything else not stated in the factbooks is not used.

When that happens, just count the non-/skip posts since the last person to number correctly and continue from where that number of posts would leave yours at if everyone had numbered properly. Don't just jump to one after the multi-kill's first number when there are posts between theirs and yours.

It just seemed easier that way.

Monkey 2497 hid in a clothes dryer during a game of hide-and-seek.

It worked so well that another monkey turned it on with 2497 still inside.
