Brodequin - *Strappado*

“ CVT Temp **wrote**:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

28 minute, 32 song album...

Gonna take a break before going through the albums with a gazillion songs on them.

Even with all the recent stuff I added, I'm down to only 20 bands left to go through. Mostly because I almost plowed through everything I recently added already...

Mostly.
