As the European Space Fleet is continued to be built, the weapons test would begin to emit alot of energy.

Project Mole is going well, as the foundation of Bunker A1 near New Orleans is completed, as for the other bunkers, A2 and A3 have reached 23% completion. Back in Australia, Western Australia completed a second underground city, New Coober Pedy, they also have plans to expand Subterranea in order to accommodate more people in it, The Republic of Slime has also complete their first subterranean town of Slime-1. But all three nations embarking on their safe haven projects have began to notice the increasing costs of their projects are skyrocketing in a frightening rate.

The GAR considers sending the Ultimatum to Papua New Guinea but due to their limits only extending into Asia they don't know whether to incorporate them too.

The Shan Republic, Kachin, Sabah, Laos, Cambodia, Sarawak, Wa State accept the Mongol Ultimatum, the rest of SEA have yet to respond

Gansu elects Eden Margin as their new president. A small revolution located in the Far East brews. In a few days, it turns into a huge headache for The Warring State of Mongolia and they attempt to quell the rebellions by sending in the military but to no avail. Mongolia finally gives up and a large chunk of Siberia goes free. The border extends towards the Heihe-Tengchong line (the long side)
