The frak. Someone mixed the entire Hybrid Theory Linkin Park album with Gangnam Style. I can see doing one song but the entire album?...It turns it into like generic J-Rock with extra metal aspects to it.

The Internet is a weird place.

Holy. Fuck. This just made my day.

Time to plow through some Melt Banana.

18-song album that doesn't look terribly long.

I mean, the entire playlist is 4 hours long and has 8 albums...and 145 songs.

Melt Banana-Sick ZIP Everywhere

Well, I think melt banana is kind of all punk, but this one is classified as 'noise rock', while the other one was classified as punk.

Dead Can Dance - *Advent*

“ CVT Temp **wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
