Godflesh - *Wilderness Of Mirrors Dub*

**CVT Temp wrote:**  
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Stupid Internet died, along with iffy power problems today.

Also, my Internet is still being EXTREMELY slow, so it isn't really fully back.

For some reason the chorus in that song gets on my nerves. With that whole Dubstep metal thing, I think last album they mixed it well, but now it feels like Korn went back to being stale again.
