All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I need to listen to more Swans. I listened to about 3 albums of theirs. Been avoiding theirs recently because they're so damn long, and I was busy picking off the shorter ones.

The Mars Volta-El Ciervo Vulnerado

Last song before sleep.
