Billy Joel - Movin' Out (Anthony's Song)  
From *The Stranger* (1977)

*Anthony works in the grocery store  
Savin' his pennies for some day  
Mama Leone left a note on the door  
She said, "Sonny, move out to the country."*

*Oh but workin' too hard can give you a heart attack-ack-ack-ack-ack-ack  
You oughta know by now  
Who needs a house out in Hackensack?  
Is that all you get for your money?*

Male, 23, Indonesian

Major partner in free association with [Faraby](#) (that's my puppet/secondary nation IRL).

[Factbook](#)

*Impossible is just a big word thrown around by small men who find it easier to live in the world they've been given than to explore the power they have to change it. Impossible is not a fact. It's an opinion. Impossible is not a declaration. It's a dare. Impossible is potential. Impossible is temporary. Impossible is nothing.*  
-Muhammad Ali

Might is right, and to devour those who are weak!*

The first time I'm ever listening to the band. And no, I'm not a fan of their newer material, the first 4 albums were diamond though.

Mr Brightside - The Killers

I have this issue with bands where I would be kinda eh about everything they make *but* the exception to that rule is something I love for some reason. The Killers with Mr Brightside; The NBHD with Sweater Weather and Two Door Cinema Club with What You Know...

Now mostly a politik discuss account.

FM Attack - Sleepless Nights

Been loving this track since I first heard it in late 2011.

Love Her Madly - The Doors.  
Album: *L.A. Woman* (1971).  
Genre: Blues rock.

*Don't you love her as she's walkin' out the door?*

*Days like dominoes, all in a line*

*Emerge transformed in a million years, from days like these*

Art Of Burning Water - *You Won't Know 'Till You've Cried*

**CVT Temp wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
