All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Ugh, restarted Spotify and now it updated me to the stupider version of Spotify. My main complaint being that instead of making their system of telling you how long your playlist is, they made it worse. Before, it would tell you if a playlist was an hour, or a day, but not like....a day and 23 hours. Now it just says absolutely nothing at all.
