A chain is a serial assembly of connected pieces, called links, typically made of metal, with an overall character similar to that of a rope in that it is flexible and curved in compression but linear, rigid, and load-bearing in tension. A chain may consist of two or more links. Chains can be classified by their design, which can be dictated by their use.

Don't break the chain (CHAIN AWARDS OUT NOW)

Taiwan is a country, Tiananmen Square Protests happened, and free Tibet.

Ukraine is not Russia, and it will never be.

Russia and China cutting Ukraine and Taiwan like a cake.
