I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Elton John - Your Song

[Live performance, October 21, 1988](#)

*I sat on the roof and kicked off the moss  
Well a few of the verses well they've got me quite cross  
But the sun's been quite kind  
While I wrote this song  
It's for people like you that  
Keep it turned on*

*So excuse me forgetting  
But these things I do  
You see I've forgotten  
If they're green or they're blue  
Anyway the thing is what I really mean  
Yours are the sweetest eyes I've ever seen*

Taylor Swift - Shake It Off

From 1989 (2014)
