Chvrches - Down Side of Me

This took the turn into boring territory FAST. I was actually expecting it to be surprisingly interesting to me based off of the singles surpassing my expectations (I just expected them to become super cookie cutter, because they were questionably like that always), but now it just got very bland.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Arch Enemy - Mechanic God Creation

Been about to listen to this album (not just songs Nemesis and Carry the Cross) for about 8 years now. It's proving to not be worth it.

"Weird Al" Yankovic - [Party In The CIA](#)-People of think of American Dad with this song, but I think of [the secret show](#) (admittedly, I haven't seen American Dad, but I have seen the secret show). But the art style for the music video is definitely very secret show-esque.
