I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Hypocrisy - Black Metal

Probably the best track on the album. Because it's a cover song!

It's kinda funny how I love and enjoy slow paced doom metal songs, but when it's slow paced death metal like this I find it really really boring and dull...

Pretty boring song imo, I'm not really a fan of death metal, really picky.

Hypocrisy - Exclamation of a Necrofag

boring? not at all. I'm into death metal occasionally, specially after watching snuff films. I'm more into Drum&Bass though

ONE MORE ALBUM TO GO!

Which I trimmed down a lot, getting rid of remixed and whatnot...
