and then.

All of a sudden. Without warning. [Abkhaz-Birth] just surrenders, and dies. All the people and the like celebrate, yadda yadda, this is getting boring, man dies if they aren't already dead, and finally, there is a new man.

Born in the Penguin Kingdom as a racing driver.

Man realizes that because he is not a penguin, yet in the Penguin Kingdom, he has a high risk of being pecked to death. However, man is a racing driver, which he uses to impress the penguins and therefore is granted a Penguin Pardon. In exchange, he teaches the penguins to race and becomes the head of the NICECAR Antarctic Penguin Racing Division. They win all the games because no one else races in the frozen expanses that are Antarctica.

Man's Championship is a massive success driving many people to Antarctica, and a referendum declares him the King of all Antarctica. The Man then puts on a crown.

Man dies from a vibrio infection and sinks into the shipwreck, which happens to be right off the city of Aq̄a, the capital of Abkhazia.

All was not yet done in Abkhazia; a large piece of metal shoots out of the water from around the shipwreck at Mach 27. 90 minutes later, it falls back to the surface and impales Man 1 through the heart. He gets tetanus as well, combined with severe burns (the atmospheric reentry saw the metal surface heat up to over 1000°C) and Miku takes him back to the hospital; he dies there.

RIP Man 1, 2051-2491

After that, a new spirit arises, and the ship floats again for the time being. This is [Abkhaz-Life].
