I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

You say Lady Gaga, I say Pizza Kids
You say Jason Derulo, I say Kids, Pizza Kids
You say T-Pain, I say P-Kids
You say Ke\$sha, I say Pizza Kids
You say Pitbull, I say Pizza Kids
You say Justin Bieber, I say Pizza Kids and go order a slice
98% percent of people now listen to non-Pizza Kids music, if you are one of the 2% who listens to real music, call your buddy Mario and tell him to make you a nice pie.
