“Azrael wrote:

I'm fooling around on my acoustic right now. Just doing that leads to a lot of good ideas flowing through my brain. Maybe I'll record what comes out of this.

I was just fooling around on the acoustic guitar my dad pretty much just gave me, since he had another one anyway. He kinda collects instruments, at least when we had money. If we had a lot of money, he would probably have a large instrument collection. Better then having a large collection of \$100,000+ cars...I mean, if I was rich, I'd spoil myself with at least once expensive car, but geez, people suck their money away too much.

I wish I knew all the names of the instruments my dad has. I know he has a bass, an electric guitar, 2 acoustic guitars, a dulcimer I believe, a banjo that is his grandmas, which is kinda awesome even though it doesn't really work, and so on with instruments I forgot the name of.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
