Earth And Fire - *Maybe Tomorrow, Maybe Tonight*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Janie Jones Soundtrack-Abigail Breslin and Alessandro Nivola-Find Love

The best song in the movie. Even then it isn't great, and is more of a good chill song for me. Listened to it a whole bunch at one point just because it was a good relaxing song.
