Just looked them up. Geez, what's with Norway and their black metal bands?!

It's kind of a significant regional scene there.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I'm actually quite enjoying them. Like I expected, they are probably one of those bands that I can't really listen to all the time, though. All I know is I keep listening to "All I know" on repeat...and I totally didn't mean to just say "All I know is I'm listening to all I know"....

No matter how much I end up listening to them, they definitely have music talent, in a varying range of sounding songs.
