Recommended if you like that sort of thing:

Quite upbeat and isn't desperate to make some massive impact drop, just a nice tune to listen to.

[Mein Bester Kamerad - Sleipnir.](#)

Be careful taking that gun from my cold dead hands, *the barrel is going to be a little hot.*  
When the boot of the State is pressed on your throat, *it doesn't matter if it's the right foot or the left.*  
No LD50 data available for death, seems like it just gets everyone.

Nomeansno - *Wiggly Worm*

“ CVT Temp [wrote](#):

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
