I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

### Between the Buried and Me - "*Fossil Genera - A Feed from Cloud Mountain*"

From the album "*The Great Misdirect*" (2009)

This album is certainly on par with their last album I listened to.

LOVE. THAT. SONG. ☐

Catholic, pro-life, and proud of it. I prefer my debates on religion, politics, and sports with some coffee and a little Aquinas and G.K. CHESTERTON here and there. :3

Unofficial #1 fan of the Who Dat Nation.
