The islanders were able to resist Spanish and Portuguese colonialism in the 1500s (and British in the 1600s) due to the Red Fever, carried by fleas on livestock. However, they were still devastated by smallpox from the colonists. The government focused on isolationism, militarism, and a centralization of the social structure around the nobility, along with the adoption of foreign weapons and military tactics. Knowledge about the outside world was gained via trade with Moroccans. In the late 19th century, the British tried to open the island for trade by force and succeeded in capturing the capital. The government retreated inland and from entrenched positions, engaged in hit-and-run and human wave attacks, leading to a British retreat, but with many losses as well. There were also revolts that caused the military government to fall.

Miku is ICly regarded as a traditional folk figure rather than an actual time-traveller. The image of Miku being a traditional Japanese folk artist is honestly hilarious, since my admittedly-meager knowledge of her is very synth-based.

There was a Cold War in the 21st century between the US and China, which were both opposed to the still-existing USSR. The Democratic Party (more of a socialist/white nationalist "Dixiecrat" party in this universe) and the "New Left" Progressive Party became more radicalized after the Great Middle-Eastern War. Increasing economic inequality and unemployment from automation led to the second Great Depression. Chinese investors took advantage of the US economy, the Republican Party became more Christian fundamentalist, and the Progressive Party became directly discriminatory towards white people.

They operate a centrally-planned economy though many socialists would argue whether they count as such, having a hereditary government in line and all that. In that sense, King Emilio and Asia Myles have a lot of male heirs should the need ever arise or things go awry. A LOT.

The whole of Tohorin's defense force has a personnel number of 20,000, which is certainly... impressively small for a land of 662 thousand squarekilometers, but not *that* small for the population of said country. I wonder if that population is concentrated somewhere.

Marsoslovakia is a settler civilization of Slavs on Mars -as the name would imply- made of about 84 million people that's concentrated for the most part around the western coasts of what they call the People's Sea (which is, in fact, just a large lake).

Psychotic Dictatorship

by **Khoronzon** » Wed Dec 02, 2020 1:23 pm

Rather than being based on periodic voting as in a conventional democracy, Leskya's political system revolves around consensus from continuous deliberation, involving every member of a community on a constant basis. This principle is referred to as "rizomatismo". Another thing I've learned is that their factbook formatting breaks up a bit on monitors with a wider aspect ratio than 4:3 - it's not *too* big of a deal since I can just shrink my browser window to read them properly, but it might be worth noting.
