floating silent stream. i'm not sure who did it or even where i got it from.
now it's something called bybirth, likewise as above.

at any given moment the most likely musicians are foxamore, sage taylor,
tundra fox, something from sounddogs, something from synth music direct,
something from one of the other musicians on fa, or possibly some anime
thing, something of my own, or, and most likely, some kind of sythasized
space sculpture.

well now it's dab's winter waltz. another of the wonderful furry musicians on fa.

there's also a 99.999% probability, that whatever i listen too, will have been
lawfully and legitimately free.
there ARE damd good musicians in this world who are NOT owned by the music
industry association.
(and more then half of them better then anything commercial)
many of whom are also generous, and i love and appreciate them all.

now it's tau ceti, reshaped by textural being.
