I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

This video has only been on you tube for two days and already has over 924.000 hits.

Song " La Gozadera" (which generally means to have a good time) Theme seems to be Latino unity since they mention the nations of Latin America.

Group is "Gente De Zona" and features Marc Anthony Cuba filmed in Cuba and the Dominican Republics Capital Cities. Genre - Tropical
