Bring Me The Horizon - Can You Feel My Heart (Synth & FX Stem File)

This actually sounds really good on its own. All the details are clear and it has this dark mysterious vibe which you don't really get in the full song.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Bring Me the Horizon' style of music is the kind of style that has always got on my nerves for some reason, but listening to this song of theirs, it is at least MUCH more interesting then what I usually hear out of that style.
