Skinny Puppy - *Rodent*

**CVT Temp wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

### The Outrunners - Diamonds

This takes me way back. Mental images of the 80s and memories of late 2011 when I started discovering this genre ☐  
I LOVE this track.

### The Outrunners - Mirror Shades

I had heard Runaways and Diamonds long ago but now was the first time I ever listened to other 6 songs on this album. And now I gotta smack myself for not doing so earlier, this album is definitely one of my favorite electronic albums, 10/10.
