I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Definitely do. I've only heard their first album but it's very Godspeed like (although not quite as good). Apparently their later albums move in a different direction though.

I've heard mixed opinions on the project but I'll definitely be listening to them at some point.

It's official, I'm losing what little musical sense I once had.

We do not speak Arabic, are not in anyway related to Arabs, and are separate from Arabs in every way, both in real life and game-wise. Calling us Arabs would be the same as bringing under question our legitimacy.
