I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Secret Chiefs 3-Septarshi

90% of Secret Chiefs 3 song names mean nothing to me.

Considering that Trey Spruance is known for making albums with a ton of just...really weird context that makes no sense to me, I guess it is no surprise.

I mean, he has reasons why covering old french songs, the theme for the 80's movie Halloween, and so on fit perfectly into his albums. Think they even covered an American military song.
