Cosmic radiation radically altered their genetic and physical traits, meaning the original 12 races's distinctions are largely meaningless now.

They control much of the global east in a communist alliance superstate. Everywhere from Somalia, to Kamchatka is under their control. Also they were quite resistant to introducing some market capitalism style reforms in the 90s.

Sith State in Southern Africa, that controls Macau, East Timor, New Britain, Goa, Cabinda and Kaliningrad. Recognised global power with highly advanced technology, military force and magic to show for it.

As the world's landscape continued to be affected by climate change, Humanity was forced to retreat underground, via massive underground cities that connected with each other via tunnels. Dixvia is, presumably, the only nation which emerged as a result of this.

They prize fashion as one of their top priorities, they are an example of a matriarchy without any malevolent overtones, and their language is a mixture of English, Japanese, and Cyrillic influences that sound like gibberish to most humans.

Their nation is largely considered the leader of the International Alliance of Socialist Nations, which is important in turbulent times such as when you're in the middle of a 4 way? cold war.

Their nation also sees high development when it comes to space matters; Their first permanent lunar base is called Luna, and it was constructed in March of 2032.

Their nation also sees high development when it comes to space matters; They have a lunar base. This lunar base, strangely, is called Sol. (Sol means Sun in Spanish). This permanent base was constructed in March of 2032.

Sol, in this case, refers to the solar system, not the Moon, which is known as Luna; I am planning to add more to that part of the factbook sometime soon, covering the colonization of Mars (& it's Moons), as well as the establishment of permanent bases ever further from Earth. The Moon is home to far more than just a permanent base, as several powers have established largely self-sufficient colonies on the Moon, including an independent IASN-backed state on the planet.
