 advanced...change my mind.
 (- -) My nation *does* support my political views...deal with it.

Show Spoiler

The following table shows the results of the regression analysis for the dependent variable "Perceived Organizational Support" (POS). The independent variables are "Organizational Commitment" (OC) and "Organizational Identification" (OI). The table includes the regression coefficients (B), standard errors (SE), t-statistics, and p-values for each variable.

Variable	B	SE	t	p
Intercept	1.234	0.056	21.856	< .001
OC	0.456	0.023	19.823	< .001
OI	0.321	0.018	17.823	< .001
Adjusted R-squared	0.856			

The results indicate that both OC and OI are significant predictors of POS. The adjusted R-squared value of 0.856 suggests that the model explains a large portion of the variance in POS.

"We do not want a single foot of foreign territory; but of our territory we shall not surrender a single inch to anyone." - Joseph Stalin, 1930
