I now have 4 categories of types of music with about only one artist left to go through (again). Woo!

Jazz, Industrial/Goth, Folk, and Noise. Makin' good progress! Almost have 700 albums and EP's (And soundtracks) rated on Rateyourmusic now. Of course I'm mostly avoiding EP's right now and finishing up LP's, but still.

Considering I have like 1077 total ALBUMS, not counting EP's and soundtracks, I have a long ways to go. I don't know how many EP's I have, but I have about 40 soundtracks to rate.

The Kilimanjaro Darkjazz Ensemble-March of the Swine

20 minute song

Haujobb - *Perfect Average*

“ CVT Temp wrote:
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
