Elves in their canon are the shapeshifted forms and descendants of an ancient magical bovine race, which conquered and unified the hundreds of small kingdoms that the Asim people used to live in after killing their pantheon, and continues to rule over them as second-class citizens. They seem to be the subject of derisive folk stories among the locals, as evidenced by the tale of the Vengeful Elf, though it's unlikely that such stories are allowed to circulate very openly.

*Nothing much to known about their leader other than obligatory mentions of her education and acheivements and even less for their actual nation itself aside from being located on Mars. Though, if I would a guess given my last encounter with them. They pretty much admitted that their government only exists as an arm for corporations to further their financial interests. Bascially, their rule basically is similar to the pro-SDC regional government of Vacuo before it's collapse.*

During the Winter Solstice, they perform the ceremony called "Sun Dance", which is a bloodletting ritual meant to offer morsels of blood to the Sun/Tohorin, so she can regain her strength and vanquish the Winter's nocturnal darkness, thus ensuring the cycle of agricultural regeneration and growth during Spring and Summer.
