All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Wavves - *Demon to Lean On*

Your nation is like a son. What it does right is your merit, as well as what it does wrong is your fault. When you praise it, be lucid and avoid exaggeration. Praising it too much can make it indolent. On the other hand, when you criticize it, be harsh, but do not ridicule it. Do your best to improve it, not through derision or disdain, but through good examples and dedication.

Hmm, for once, except maybe beyond Dalek, choosing a hip-hop artist isn't technically a fast way to go through albums...This album is over an hour long.

I swear as much as i listen to hip-hop, I can never fully get used to it like I have with various metal genres and other types of music...

This is definitely interesting, though, every now and then when I can get in more of a hip-hop mood.

And there are definitely exceptions with hip-hop that I instantly like fine.
