Ozric Tentacles-Erpland

After yesterday, where I had a lack of music listening, I'm going to try and focus more on listening to music today. That's if I don't get antsy sitting here and end up doing something else. And if I can find a way to keep myself occupied at the computer so I don't get bored...Been having that problem lately.

Goal today: Finish re-listening to the rest of the psychedelic albums I have...Which is like 1 or 2 more?

White Zombie - *Super-Charger Heaven (Adults Only Mix)*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I would say if you're roommates, and you use your computers next to each other, you both should probably invest in headphones so you don't annoy each other
