I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Modestep - Another Day

This track has been a favourite of mine for a while. It was pretty much the first track that ended up in this playlist I continually add to:

[https://www.youtube.com/watch?v=f9EM8T5 ... m&index=14](https://www.youtube.com/watch?v=f9EM8T5...m&index=14)
(Linked to track)

That playlist once started out as being ordered by preference. It got too long to order that way :3
The last like 20 tracks are pretty good stuff that I added in the last few months.

Warning! This poster has:
