I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

GZA - Liquid Swords

When I was little... my father was famous.  
He was the greatest samurai in the empire;  
and he was the Shogun's decapitator.  
He cut off the heads of a hundred and thirty-one lords.  
It was a bad time for the empire.

The Shogun just stayed inside his castle -- and he never came out.  
People said his brain was infected by DEVILS.  
My father would come home -- he would forget about the killings.  
He wasn't scared of the Shogun, but the Shogun was scared of him.  
Maybe that was the problem.

Then, one night... the Shogun sent his ninja spies to our house.  
They were supposed to kill my father... but they didn't.  
That was the night everything changed
