CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Autechre-Steels

It's kind of difficult with around 40 tabs of porn open and playing Victoria II, while people are sending me rule 34s of stuff.

Here is the hardstyle megamix. I recommend it if you're wanting to try the genre of hardstyle, as it's a perfect list.
