Okay, I feel the need to stop spamming a bunch of short songs quickly while nobody else is posting.

Edit: Aaand someone posts when I say this

Yeah, I'm posting, I'm just slow... and jesus, if you like mad guitars, check this out:

[Mega Man 4 - Skull Man Stage \(guitar arrange\)](#)

Was feeling nostalgic and looking for some of my old faves from back in the day and I stumbled across this gem. Beautiful. Here's the original for comparison:

Not bad. For some reason it made me think of [this](#)

[18 Wheels of Steel: Pedal to the Metal Soundtrack-Main Theme](#)

Oh man memories of me playing this....a game that should of worked perfectly on my computer but lagged pretty bad at times.

Edit: Games like this were some of the first video games I ever played. As in, when I was 8 or 9 I played these games. I've been a gamer forever and I will continue to be a gamer forever!

Same here. I first played MM4 back in... oh, I guess it was sometime in '92. I was six or seven at the time.

That's a pretty good track, but again, if you want awesome guitars and such:

Secret Chiefs 3 is officially my 2nd band on Last.fm to hit over 100 scrobbles and it has surpassed the previous highest, at 102 scrobbles, which was Radiohead.

Yes, you all care to know that so bad.

Secret Chiefs 3-Zulfiqar III

Edit: At this rate the thread will hit its limit in a total of 4 months. The first half of it was done in 2 months....

Thing is, August sounds like it will be a rather busy time for me so I won't be helping it go up ☐

I like it. Sounds like good chill music, I might put it on my phone. ☐

On with the nostalgia overload!

Misery Loves Co. - *Taste It (Imaginary Gun)*

“ CVT Temp **wrote**:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
