I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Great band. Got the album on vinyl yesterday.

By the way, there's a rumour going round that Godspeed You! Black Emperor's long lost demo All Lights Fucked on the Hairy Amp Drooling has surfaced. I thought it was a load of crap at first, but apparently it might be true.

Still suspicious since I haven't yet listened to the sample, but I never thought it would ever leak.
