A Orwellian superstate made up of pan-asiatic federation of soviet-style republics. Their architecture seems to favour cyberpunk-esque megacities and the more depressed their leadership is, the more crueller they're to their own citizenry.

BN note: Actually brainstorm from what you have read in the factbooks.

Sorry i had to drill my head again and trying to locate my missing brain part.

Three trucks holding thirty-five heavily armed balaclava-wearing men in grey jumpsuits swiftly dropped off and marched upon the steps of a large state complex. Gunshots echo throughout the pillared hallways of the former Altesian local state capitol as Shool's men stormed it facing little to no resistance aside from a lone elderly janitor refusing them entry which led to Drim personally rewarding the old man's stubbornness with a bullet between his eyes. The suspicious lifelessness of the state building didn't concern him at all, what matters are reports of Premier Levi acceptance of the various reforms from the race traitors in the parliament which will result in accelerating of the imminent collapse of Remnant's pure & superior human civilization into a abyss of degeneracy and miscegenation, where Faunus scum would surely hold absolute mastery over mankind as they know it. Drim orders his men to hastily barricade windows and entrances of the building.

Soo this is about Racial (Human being Superior and other species being Inferior) War huh

What if, the Weimar Republic evolved into a hybrid mix of ex-Weimar policies, Strasserism, heavy Patriotism and a Reich? You get this, oh, and it's set in a very alternate universe...of an alternate universe, yeah.

The rest of the Allies describe the RoK as "valiant". I suppose they'd have to be, given how they're surrounded on all sides by much larger enemies and yet stand.

Ghesite culture as it seems, incredibly values loyalty while having a deep seated hatred for kniving backstabbers. It basically goes like something this "We build altars for heroes, and only bullets for traitors". Although, in their setting's context 'bullets' will either probably be replaced with spears or arrows.

That's incredibly accurate, considering how I literally haven't begun the culture factbook outside of notes at the moment. Nice!

They employ a largely ceremonial policy of keeping cats and dogs in various government buildings. Such animals were originally intended to assist in eliminating the presence of any vermin (including burglars) but are now just kept around because KITTY AND BUBBY!

So they've just lazily posted links to haha funny ideologies like Bioposadism and FALGC as the founding ideals of their state. Cool.

EDITING...

They employ the service of independent tribesmen like the Aledhi in their horde. They give them autonomy in exchange for service such as protecting their way of life and trade routes.

† The State of Lazarie †

Lumière du Pacifique (1965)

- Set in the world of **TNO** in the backdrop of an Axis victory, Lazarie is a former Vichy French protectorate-turned Imperial Japanese collaborationist state in the southern Pacific.
- A kingdom and an odd Francophone among the Co-Prosperity Sphere; it attempts to do its best to maintain its autonomy and quasi-democracy from the empire's hands. Ruled by an Orleanist branch in this Pacific island and the Japanese garrison stands on guard for any "OFN incursion".

Apparently their version of the Communist Manifesto updated to the 21st Century starts off with the reader seeing images of somewhat picturesque monolithic architecture and space stations. Well, that's one way to get people to read it I guess.

BN note: Actually read and brainstorm, lazily citing my warning that it may not best to view it on mobile doesn't count.
